*“Olumsuzluklar üzerine bir teoriniz olsa ne yazardınız? Benim “fanus” diye bir teorim vardı. İnsanlık kendi sonunu hazırlıyordu. Her gün kirlenen bir evrende, bananeci zihniyetle günlerini geçiştiren varlıklar bir gün fanuslarda yaşamaya mahkum kalacaktı. Oksijen kaynaklarını gözünü kırpmadan yok eden insanlık, sonunda minik fanusların esiri olacaktı.*

*Bunun üzerine o kadar çok kelime sarf edebilir ki zihnim, sonunda kendimden bile tiksinnem olası bir sonuç olacaktır.*

*Sözü fazla uzatmadan, bizim hikayemizin seyrine girmek isterim, 4 olmak...*

**1 olmak;** henüz ortaokul öğrencisiyken dağda bayırda gezer idim, olur olmaz börtü böceği eve getirir, sık sık annemin fırçalarına maruz kalırdım. Zaman geçti, büyüdüm, duruldum, sonra geçmiş rahat bırakmadı. Hatırladım, nasıl da büyük keyifle izlerdim, eve getirdiğim bukalemunu, rahmetli Kemal Öğretmenin kitaplarından ne yer ne içerler diye bakardım. Yanlış metodlarım sonucu birkaç da telef ettiğim canlı olmadı değil. Her şey böyleyken sevgili Nadir Abi'yle birlikte başladı fotoğraf serüvenim. Makinayı ilk elime aldığımda böcek fotoğrafı çekmek istedim, öylede oldu. Başka bir şey çekerken elim deklanşöre zor bastı desem yeridir. Varsa yoksa böceklerdi benim için artık. Her şey böyleyken....

**1+1=2 olmak;** zor bir insan çıktı karşıma, tarzı herkes tarafından tartışılan. Anlatılamaz yaşanır denilen bir duygu vardı bu hatun kişide. Yeni bir tür kelebek çektiğinde, çılgın kahkahalar atan, kendini tutmadan deliler gibi oradan oraya koşturan, hep bir adım ilerisi için kendini paralayarak Vildan kişisi. Yaşamın bir noktasında, yollarımız kesişti Vildan kişisiyle, bazı zamanlar zor olmadı değil ama biz ordayken, ordaydık. Başka bir şey yoktu, zaman kavramını yitirdiğimiz zamanlarda susuzluk ve açlık onu hiç bitirmemişti ama taş gibi duran bu hatun kişinin, haksız yere söylenen iki kelime zaman zaman yenik düşme noktasına geldiğini ve hemen nasıl da toparladığını bazen şaşkınlıkla bazen de ne yapacağımı bilemez bir şekilde izledim. Herkese inat, zaman zaman kızsak da birbirimize, aramızdaki saygı çizgisini hiç bozmadan, makinelerimizi ve birbirimizi hiç bırakmadık. Ve yine her şey böyleyken....

**2+2=4** olmak; Ahmet Ömer Koçak + Muhabbet Kemal, akademik konuları ilgili çevrelerce bilindiğinden bu bölümü hemen atlayacağım. Her şeyin bir zamanı vardı. Nasıl ki pupadan çıkacak güzelliğin zamanına müdahale edemiyorduk, bizde bazı hikayelerin seyrini değiştirecek birlikteliğimize müdahale edememiştik, ne erteleyebildik, ne durdurabildik, ne de hiç olmamasını sağlayabildik.

Ben hiç çer-çöp içinde bir Anadolu köyü gören bir kişiliğin gözlerinin dolduğunu görmemiştim, gördüm, etkilendim. Her söylenene kulaklarımı tıkadım, duyarlı olduklarına, samimi olduklarına inandım. Nerede durmam gerektiği konusunu düşünmedim bile, burada durmalıydım.

Kuşkusuz babamdan kalma bir düşünce ki, bilginin kutsallığını ve değerini asla es geçemedim. Klasiktir belki ama “bana bir kelime öğretinin bin yıl kölesi olurum” teması önemli bir ayrıntıdır hayatta diye düşünürüm. Bu iki bireyin bana aktardıkları bilgilerin değeri paha biçilemez boyutta. Bu durum için doğru sözcükler kullanmakta zorlanıyorum. İnandığım şu ki, ne olursa olsun benim için hayat boyu ilk kaynağım olma özelliğini koruyacaklardır ve adlarını zikretmekten onur duyacağım güzel insanlar olarak kalacaklardır.

Bir duruma ait duygunuz varsa, bunu anlayabilecekler sadece orda o duyguyu hissedebilenlerdir. Bizi bir araya getiren bu ortak duygulardı sanırım. 1 ya da 1+1 bazen bu duyguları tanımlamada sorun yaşasa da, 2+2= 4 olduklarında her şey tamam oluyordu.

Sonuç olarak, kahverengiyle mavinin arasında olup bitenleri umursayan bir birliktelik için 2 + 2 = 4 bence mükemmel bir rakamdı.” **Demet Çelikkaya.**

This is a new but meaningful beginning of the Cesa team with the four authors, although the following notes are composed of a few observations in early April in the vicinity of İzmir city.

On 9 and 11 April 2009 within the very limited time, the authors observed some spring insects occurring in the vicinity of the city İzmir (West Turkey). The weather was sunny but cool after a heavy rain. The visited places were in the districts Kemalpaşa, Buca, and Seferihisar districts. Observed 49 species (see below) belong to the seven insect orders.

The plant cover of the studied areas are mainly macchies more or less degraded by *Pinus*, *Olea* plantations, or changed into *Sarcopoterium-Asphodelus* communities (*Rosaceae/Liliaceae*) in the openings (**Figs. 1-12**). Species appearing after hibernation are marked in the list with “\*”.

## List of the Insects

According the ongoing research project of the Cesa entitled “Entomofauna of Turkey”, the present number of the species of the pterygot insects recorded in İzmir province is 1255. This reflects of course very little part of the estimated pterygots fauna of the province.

In the list, 51 diurnal species of the vernal fauna around İzmir, recorded by the authors (**Figs.13-15**), belong to seven orders: *Orthoptera* (1), *Mantodea* (1), *Hemiptera* (8), *Lepidoptera* (25), *Diptera* (4), *Hymenoptera* (4), and *Coleoptera* (8).

### *Orthoptera*

#### ***Acrididae***

*Anacridium* Uvarov, 1923

*Anacridium aegyptium* (Linnaeus, 1764)\*. Observed several adults (**Fig.16**).

### *Mantodea*

#### ***Empusidae***

*Empusa* Illiger, 1798

*Empusa fasciata* Brullé, 1836. In the province, only the nymphs may be observed in spring. They usually sit on thorny *Sarcopoterium* plants (**Fig.17**).

From western Mediterranean countries of Europe and North Africa to the Middle East, Turkey, Cyprus, Palestine, Egypt and Iran. In Turkey, this species is reported so far from the following

provinces: Amasya, Ankara, Antalya, Bursa, Diyarbakır, Hatay, İstanbul, İzmir, Konya, Manisa, Niğde, and Sinop.

## *Hemiptera*

The following 8 vernal species were recorded (**Figs. 18-24**).

*Graphosoma* De Laporte, 1832

*Graphosoma lineatum* (Linnaeus, 1758) (**Fig. 18**). Various attributions to *G. italicum* (Müller, 1766) should be treated as *G. lineatum* (Linnaeus, 1758).

*Carpocoris* Kolenati, 1846

*Carpocoris fuscispinosus* (Boheman, 1851) (**Fig. 19**)

The species is widely distributed in Central and West Turkey. Several females were observed at Seferihisar, during egg laying on the flowers of *Sisymbrium altissimum* (*Brassicaceae*), growing on the roadside. After four days caterpillars hatched in the box. Due to the breeding difficulties young *Capsella bursa-pastoris* plants were given to the young caterpillars in Van city (East Turkey). They accepted eating *Capsella bursa-pastoris* flowers and fruits in the captivity. Larval foodplants of *Euchloe ausonia* (Hbn.) were mentioned in the literature as *Sinapis arvensis*, *Isatis tinctoria*, *I. glauca*, *Aethionema saxatile*, *Iberis sempervirens*, *Biscutella mollis*, *B. laevigata*, *Bunias erucago*, *Alyssum saxatile* (Lorkovic,1965; Back,1979; Tolman,1997)<sup>1</sup>; *Descurainia sophioides* from Russia<sup>2</sup>. ## Results of the Entomofauna Projects of the Cesa

### 6- List of the 11132 pterygot insect species of Turkey hitherto recorded in the database of the Cesa

**Ahmet Ömer Koçak<sup>6</sup> Muhabbet Kemal**

This is the first attempt on compiling the pterygot insects of Turkey, as well as of the Old World countries in an database program, and publishing the results at irregular intervals. All the responsibilities of the program arrangements, and typing the faunal information belong to the author. The Project itself is young <sup>7</sup>, therefore the faunal information typed into the database is very incomplete. However, the published temporary results appear to be extremely important, as no similar publication in the related literature has been published so far.

Previously, several temporary results were published in this online journal.<sup>8</sup> Brief numerical information on the present revised report are given below (see also Tables 1-3):

**Total number of the records:** 29013  
**Total number of species:** 22911  
**Total number of subspecies:** 1015  
**Total number of genera:** 4296  
**Total number of family group taxa:** 749  
**Total number of species in Turkey:** 5963 [11131 (with Lepidoptera)]  
**Total number of species in Old World:** 22911 (without Lepidoptera)

**Updated:** 30.4.2009
